What are the top ten genres that sold most in the marketplace?

Total amount sold for each genre

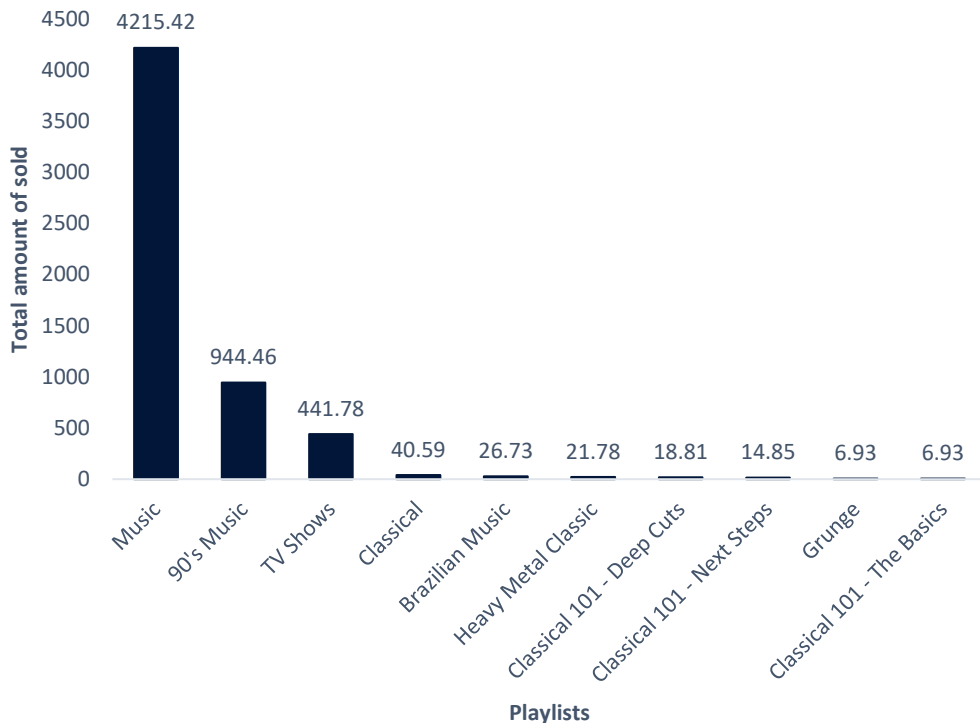

We can see that the Total amount of sold of Rock genre is more than other genres, and with no argument its number one. Its amount of sold is almost double of the Latin genre, which is in the second place.

After Latin, Metal and Alternative & Punk genres, the other genres stay around one hundred total amount of sold or less.

What are the top ten playlists that sold most in the marketplace?

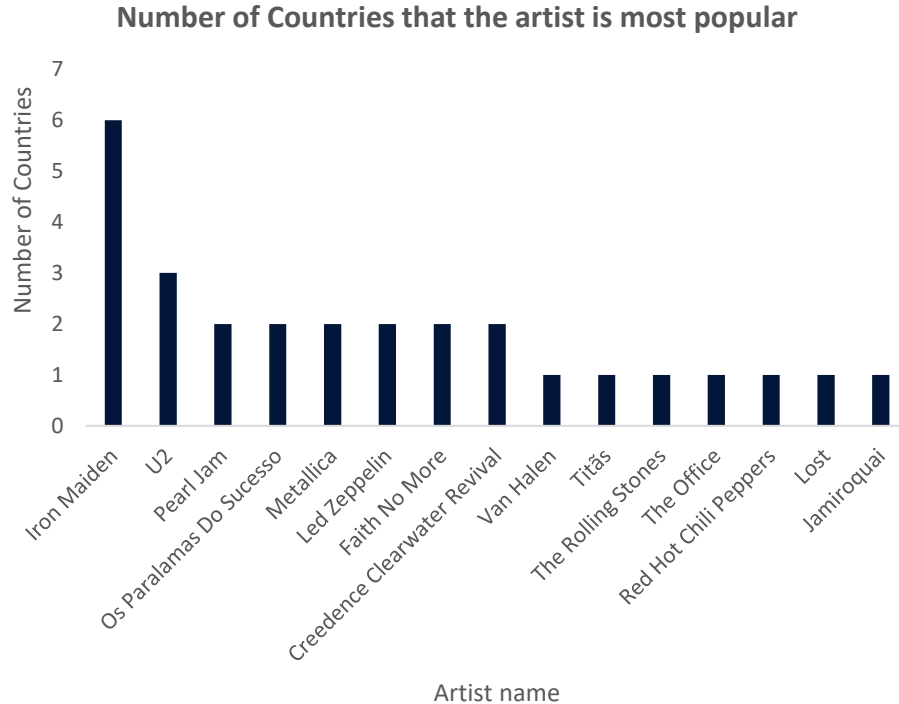

Total amount sold for each playlist

We can see that the Total amount of sold of Music playlist is by far more than other playlists, and with no argument is number one.

After that, 90s Music and TV Shows are at the second and the third place with almost similar amount of total amount of sold. Other playlists have very low similar amount.

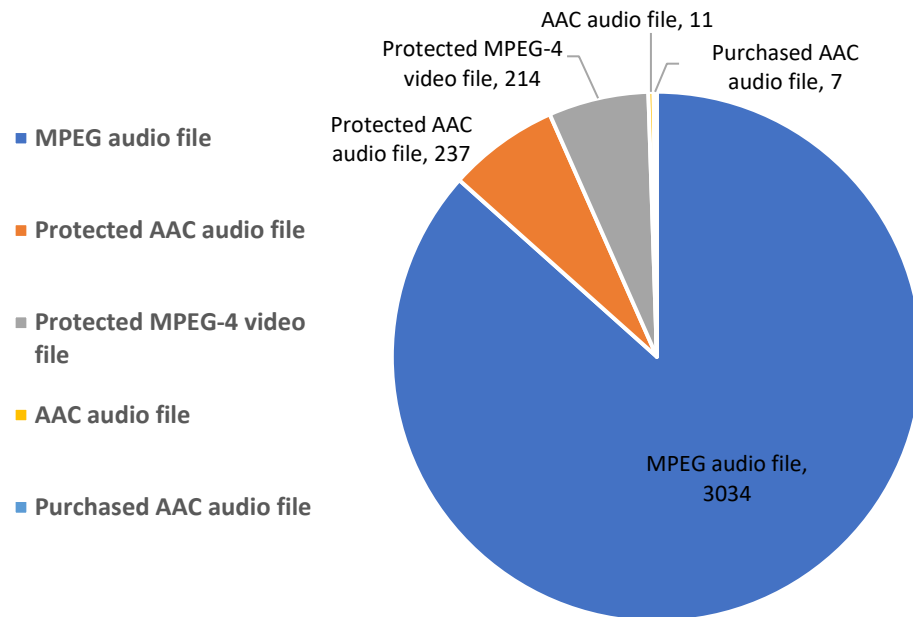

Who is the Most popular Artist in each country? And in how many countries is most popular?

Iron Maiden is the most popular artist in six countries based on the number of tracks sold. After that, U2 is the most popular in three countries and others are the most popular in one or two countries. All the artists presented on the chart are the most popular artist in at least one country.

Which media type is used the most?

Number of tracks in different media types

As we can see MPEG audio file is by far the number one and the most used media type for most of the tracks, 3034 tracks used this media type. After that, Protected AAC audio file and Protected MPEG-4 video file are in the second and third position, with respective 237 and 214 tracks used these media types. Other media types are rarely used.
